

## PLEATED CARTRIDGE FOR BAG FILTERS – PLB

### SPECIFICATIONS

- Suitable for use with all size 1 and 2 bag housings
- Pleated filter media in combination with permeable drainage layers for optimum use of available filter air
- Polypropylene outer protection providing stiffness to the filter element
- Polypropylene body
- PP/PES filter medium
- Assembly via heat-sealing with no resin or adhesive
- Suitable for food use
- Anti-migration treatment of fibres

### BENEFITS

- Filtering surface 10 times larger than bags
- Higher flow rates in smaller spaces
- Significant build-up capability (up to 700 g for size 2)
- Excellent ratio between flow rate and high filtering surface area, resulting in low pressure drops
- Longer life than bags
- Reduction in maintenance activities

### Standard nominal lengths:

- 1 = Suitable for size 1 bag housings
- 2 = Suitable for size 2 bag housings
